ANALYTIC SUBJECT INDEX

Absorption spectrum of Cr^{3+} (see *$MgAl_2O_4$ spinel*) 152 (1988) 379
ac response
– Dynamics of critical phenomena in Josephson junction arrays - Martinoli 152 (1988) 146
Alloys, binary
– Enthalpies of formation of liquid and solid binary alloys based on 3d metals. V. Alloys of nickel - Niessen et al. 152 (1988) 303
Amplitude fluctuations
– Fluctuation effects in granular superconductors of intermediate paracoherent transition temperature - Fazio et al. 152 (1988) 257
Andreev reflection
– Quantum fluctuations in normal metal–superconductor and superconductor–normal metal–superconductor devices - Guinea and Schön 152 (1988) 165
Aperiodic arrays
– $T_c(H)$ for quasicrystalline micronetworks: analytical and numerical results - Nori and Niu 152 (1988) 105
Axion-packed superconductors
– — - Jacobs 152 (1988) 288

Berry phase
– Magnetic properties of a superconducting network - Gandit et al. 152 (1988) 32
Bloch oscillations
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
– Single electron effects and — in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186
– Observation of "Bloch oscillations" in granular tin films - Yoshihiro 152 (1988) 207
"Brushfire lithography"
– Very small ($\gtrsim$ 20 nm) lithographic wires, dots, rings and tunnel junctions - Dolan and Dunsmuir 152 (1988) 7
Bulk granular metals
– Superconducting coherence in — - McLean et al. 152 (1988) 230

Calibration markers
– Nanometer-scale lithography for large lateral structures - Romijn and van der Drift 152 (1988) 14
Ceramic
– Glassy behaviour in high-T_c superconductors - Morgenstern et al. 152 (1988) 85
Charging
– Transitions in lattice superconductors induced by quantum fluctuations - Jacobs and José 152 (1988) 148
Coarse graining
– Influence of dissipation on the finite temperature phase transition in Josephson junction arrays - Kampf and Schön 152 (1988) 239

Coulomb blockade
- Single electron effects and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186

Coulomb gap
- Quantum fluctuations in normal metal–superconductor and superconductor–normal metal–superconductor devices - Guinea and Schön 152 (1988) 165
- Single electron effects and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186

Coulomb gas
- Non-universal Kosterlitz–Thouless jumps and two-dimensional *XY*-type models - Minnhagen and Weber 152 (1988) 50

Cr^{3+}, optical properties (see *$MgAl_2O_4$ spinel*) 152 (1988) 379

Critical current
- On the — of a Josephson junction array in a magnetic field - Halsey 152 (1988) 22

Critical exponents
- Fractal description of ferromagnetic glasses and random Josephson networks - Lebeau et al. 152 (1988) 100

Critical resistance
- Superconducting coherence in bulk granular metals - McLean et al. 152 (1988) 230
- Models for granular superconductivity: the effect of quantum fluctuations - Zimányi 152 (1988) 233
- A quantum Ginzburg–Landau theory for the resistive transition in dissipative Josephson-junction networks - Zwerger 152 (1988) 236
- Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251

Critical sheet resistance
- Experiments on random Josephson network - Kobayashi 152 (1988) 223

Current–phase relation
- Quantum fluctuations and the — in Josephson junctions and SQUIDS - Panyukov and Zaikin 152 (1988) 162

De Almeida–Thouless line
- Glassy behaviour in high-T_c superconductors - Morgenstern et al. 152 (1988) 85

Diffusion coefficient
- Quantum interference of many states in a small Josephson junction - Weiss and Wollensak 152 (1988) 154
- Intersite vortex tunnelling in 2D lattice systems - Korshunov 152 (1988) 261

Dimensional crossover
- Fractal dimensions and — in superconducting wire networks - Gordon and Goldman 152 (1988) 125

Disorder
- — in Josephson junction arrays - Kosterlitz and Granato 152 (1988) 62
- Fractal description of ferromagnetic glasses and random Josephson networks - Lebeau et al. 152 (1988) 100
- Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251

Disordered arrays
- Spin-glass state in a disordered sine–Gordon model - Panyukov and Zaikin 152 (1988) 70

Disordered sine–Gordon model
– Spin-glass state in a — - Panyukov and Zaikin 152 (1988) 70
Dissipation
– Influence of — on the finite temperature phase transition in Josephson junction arrays - Kampf and Schön 152 (1988) 239
Dissipation-driven phase transition
– Global phase coherence and dissipation in ultra-thin superconducting films - Jaeger et al. 152 (1988) 218
Dissipative phase transition
– Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251
Domain-wall proliferation
– Monte Carlo simulations for two-dimensional *XY* models with frustration - van Himbergen 152 (1988) 46
Dry friction
– Quantum creep of vortices in granular superconductors - Larkin et al. 152 (1988) 266
Dynamics of critical phenomena
– — in Josephson junction arrays - Martinoli 152 (1988) 146

e-beam lithography
– Nanometer-scale lithography for large lateral structures - Romijn and van der Drift 152 (1988) 14
EBPG
– Nanometer-scale lithography for large lateral structures - Romijn and van der Drift 152 (1988) 14
Electron acoustic double layers (see *Plasma, multicomponent*) 152 (1988) 385
Electron-beam technology
– Very small ($\gtrsim$ 20 nm) lithographic wires, dots, rings and tunnel junctions - Dolan and Dunsmuir 152 (1988) 7
Enthalpy of formation (see *Alloys, binary*) 152 (1988) 303

Ferromagnetic glasses
– Fractal description of — and random Josephson networks - Lebeau et al. 152 (1988) 100
Fibonacci strips
– $T_c(H)$ for quasicrystalline micronetworks: analytical and numerical results - Nori and Niu 152 (1988) 105
Flow of vortices
– Quantum creep of vortices in granular superconductors - Larkin et al. 152 (1988) 266
Fluctuation conductivity
– A quantum Ginzburg–Landau theory for the resistive transition in dissipative Josephson-junction networks - Zwerger 152 (1988) 236
– Influence of dissipation on the finite temperature phase transition in Josephson junction arrays - Kampf and Schön 152 (1988) 239
Fractal
– — description of ferromagnetic glasses and random Josephson networks - Lebeau et al. 152 (1988) 100
– — dimensions and dimensional crossover in superconducting wire networks - Gordon and Goldman 152 (1988) 125

Frequency-dependent damping
– Measuring the time spent traversing the barrier while tunneling - Martinis et al. 152 (1988) 159
Frustration
– Uniformly frustrated *xy* models: ground state configurations - Teitel 152 (1988) 30
– Monte Carlo simulations for two-dimensional *XY* models with — - van Himbergen 152 (1988) 46
– $T_c(H)$ for quasicrystalline micronetworks: analytical and numerical results - Nori and Niu 152 (1988) 105
– Phase coherence and dynamics in weakly-coupled periodic and quasiperiodic superconductor arrays - van Harlingen et al. 152 (1988) 134

GaAs / AlGaAs (see *Semiconductor heterostructures*) 152 (1988) 352
Gauge invariance
– Axion-packed superconductors - Jacobs 152 (1988) 288
Glassy behaviour
– — in high-T_c superconductors - Morgenstern et al. 152 (1988) 85
Global phase coherence
– — and dissipation in ultra-thin superconducting films - Jaeger et al. 152 (1988) 218
– Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251
Granular films
– Observation of "Bloch oscillations" in granular tin films - Yoshihiro 152 (1988) 207
– A quantum Ginzburg–Landau theory for the resistive transition in dissipative Josephson-junction networks - Zwerger 152 (1988) 236
Granular superconductors
– Coherence in 3D networks: application to high-T_c superconductors - Rosenblatt et al. 152 (1988) 95
– Models for granular superconductivity: the effect of quantum fluctuations - Zimányi 152 (1988) 233
– Quantum coherent effects in Josephson junctions and — - Zaikin 152 (1988) 251
– Finite-voltage behavior of highly-disordered — - Bradley et al. 152 (1988) 282
Ground states
– On the critical current of a Josephson junction array in a magnetic field - Halsey 152 (1988) 22
– Uniformly frustrated *xy* models: ground state configurations - Teitel 152 (1988) 30

Harris criterion
– Fractal description of ferromagnetic glasses and random Josephson networks - Lebeau et al. 152 (1988) 100
Helicity modulus
– What can (and can't) be measured in superconducting networks - Lobb 152 (1988) 1
– Monte Carlo simulations for two-dimensional *XY* models with frustration - van Himbergen 152 (1988) 46
– Non-universal Kosterlitz–Thouless jumps and two-dimensional *XY*-type models - Minnhagen and Weber 152 (1988) 50
– Dynamics of critical phenomena in Josephson junction arrays - Martinoli 152 (1988) 146
– Transitions in lattice superconductors induced by quantum fluctuations - Jacobs and José 152 (1988) 148
Hexammines
– Specific heat of — - Piekara-Sady and Stankowski 152 (1988) 347

High-T_c superconductors
– Glassy behaviour in — - Morgenstern et al. 152 (1988) 85
– Coherence in 3D networks: application to — - Rosenblatt et al. 152 (1988) 95
Hot electrons
– Theory of small-amplitude modified electron acoustic double layers and solitary waves in a multicomponent plasma - Dey et al. 152 (1988) 385
Hysteretic Josephson junctions
– Finite-voltage behavior of highly-disordered granular superconductors - Bradley et al. 152 (1988) 282

Influence functional
– Quantum interference of many states in a small Josephson junction - Weiss and Wollensak 152 (1988) 154
Inverse Josephson effect
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
Irrational ration of areas
– Critical behavior of periodic networks containing tiles with irrational ratio of areas - Santhanam and Chi 152 (1988) 129

Josephson junction arrays
– Dynamics of critical phenomena in — - Martinoli 152 (1988) 146
Josephson-type oscillations
– How to observe the AC Josephson-type oscillation around the quantum Hall effect - Imry 152 (1988) 295

Kosterlitz–Thouless theory
– Dynamics of critical phenomena in Josephson junction arrays - Martinoli 152 (1988) 146

Lift-off stencils
– Very small ($\gtrsim$ 20 nm) lithographic wires, dots, rings and tunnel junctions - Dolan and Dunsmuir 152 (1988) 7
Lithography
– Very small ($\gtrsim$ 20 nm) lithographic wires, dots, rings and tunnel junctions - Dolan and Dunsmuir 152 (1988) 7
Localization phase transition
– Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251
London loop equations
– Critical behavior of periodic networks containing tiles with irrational ratio of areas - Santhanam and Chi 152 (1988) 129
Luminescence spectrum of Cr^{3+} (see *$MgAl_2O_4$ spinel*) 152 (1988) 379

Macroscopic quantum tunneling
– Measuring the time spent traversing the barrier while tunneling - Martinis et al. 152 (1988) 159
Magnetic field
– On the critical current of a Josephson junction array in a — - Halsey 152 (1988) 22
Magnetic properties
– — of a superconducting network - Gandit et al. 152 (1988) 32

Magnetoresistance
– Fractal dimensions and dimensional crossover in superconducting wire networks - Gordon and Goldman 152 (1988) 125
– Phase coherence and dynamics in weakly-coupled periodic and quasiperiodic superconductor arrays - van Harlingen et al. 152 (1988) 134
Mask techniques
– Nanometer-scale lithography for large lateral structures - Romijn and van der Drift 152 (1988) 14
Mathieu potential
– Modified method of variational calculation of generalized Wannier functions for a crystal with a model surface potential - Modrak 152 (1988) 367
Measurable quantities
– What can (and can't) be measured in superconducting networks - Lobb 152 (1988) 1
Mesoscopic tunnel junctions
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
$MgAl_2O_4$ spinel
– Optical properties of Cr^{3+} in — - Stręk et al. 152 (1988) 379
Mobility
– Quantum interference of many states in a small Josephson junction - Weiss and Wollensak 152 (1988) 154
Modulated interactions
– Monte Carlo simulations for two-dimensional *XY* models with frustration - van Himbergen 152 (1988) 46
Multi-level patterns
– Very small ($\gtrsim$ 20 nm) lithographic wires, dots, rings and tunnel junctions - Dolan and Dunsmuir 152 (1988) 7

Nanometer lithography
– Nanometer-scale lithography for large lateral structures - Romijn and van der Drift 152 (1988) 14
Networks with complex unit cells
– Critical behavior of periodic networks containing tiles with irrational ratio of areas - Santhanam and Chi 152 (1988) 129
Ni alloys
– Enthalpies of formation of liquid and solid binary alloys based on 3d metals. V. Alloys of nickel - Niessen et al. 152 (1988) 303
Non-universal jumps
– Non-universal Kosterlitz–Thouless jumps and two-dimensional *XY*-type models - Minnhagen and Weber 152 (1988) 50
Normal metal–superconductor junctions
– Quantum fluctuations in normal metal–superconductor and superconductor–normal metal–superconductor devices - Guinea and Schön 152 (1988) 165

Ohmic dissipation
– Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251
Ohmic model
– Models for granular superconductivity: the effect of quantum fluctuations - Zimányi 152 (1988) 233

Ohmic resistors
– A quantum Ginzburg–Landau theory for the resistive transition in dissipative Josephson-junction networks - Zwerger 152 (1988) 236
Oxidation
– Experiments on random Josephson network - Kobayashi 152 (1988) 223

Paracoherence
– Coherence in 3D networks: application to high-T_c superconductors - Rosenblatt et al. 152 (1988) 95
Paracoherent transition temperature
– Fluctuation effects in granular superconductors of intermediate — - Fazio et al. 152 (1988) 257
Penrose lattice
– $T_c(H)$ for quasicrystalline micronetworks: analytical and numerical results - Nori and Niu 152 (1988) 105
Penrose tile
– Phase coherence and dynamics in weakly-coupled periodic and quasiperiodic superconductor arrays - van Harlingen et al. 152 (1988) 134
Percolation clusters
– Fractal description of ferromagnetic glasses and random Josephson networks - Lebeau et al. 152 (1988) 100
– Fractal dimensions and dimensional crossover in superconducting wire networks - Gordon and Goldman 152 (1988) 125
Percolation networks
– Observation of "Bloch oscillations" in granular tin films - Yoshihiro 152 (1988) 207
– Finite-voltage behavior of highly-disordered granular superconductors - Bradley et al. 152 (1988) 282
Phase-breaking rate
– Fractal dimensions and dimensional crossover in superconducting wire networks - Gordon and Goldman 152 (1988) 125
Phase diagram
– Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251
Phase–voltage converter
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
Piezoelectric-phonon scattering (see *Semiconductor heterostructures*) 152 (1988) 352
Plasma, multicomponent
– Theory of small-amplitude modified electron acoustic double layers and solitary waves in a multicomponent plasma - Dey et al. 152 (1988) 385
Positional disorder
– Disorder in Josephson junction arrays - Kosterlitz and Granato 152 (1988) 62
Pseudoscalar field
– Axion-packed superconductors - Jacobs 152 (1988) 288

Quantum coherent effects
– — in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251
Quantum creep of vortices
– — in granular superconductors - Larkin et al. 152 (1988) 266
Quantum crystal free surface
– Intersite vortex tunnelling in 2D lattice systems - Korshunov 152 (1988) 261

Quantum fluctuations
– — and the current–phase relation in Josephson junctions and SQUIDS - Panyukov and Zaikin 152 (1988) 162
Quantum Ginzburg–Landau theory
– A — for the resistive transition in dissipative Josephson-junction networks - Zwerger 152 (1988) 236
– Influence of dissipation on the finite temperature phase transition in Josephson junction arrays - Kampf and Schön 152 (1988) 239
Quantum Hall effect
– How to observe the AC Josephson-type oscillation around the — - Imry 152 (1988) 295
Quantum induced transition
– Transitions in lattice superconductors induced by quantum fluctuations - Jacobs and José 152 (1988) 148
Quantum interference
– — of many states in a small Josephson junction - Weiss and Wollensak 152 (1988) 154
Quantum Monte Carlo method
– Transitions in lattice superconductors induced by quantum fluctuations - Jacobs and José 152 (1988) 148
Quasi-reentrant behavior
– Experiments on random Josephson network - Kobayashi 152 (1988) 223
Quasicrystalline (micro)networks
– $T_c(H)$ for quasicrystalline micronetworks: analytical and numerical results - Nori and Niu 152 (1988) 105
Quasiparticle dissipation
– Quantum coherent effects in Josephson junctions and granular superconductors - Zaikin 152 (1988) 251
Quasiparticle tunneling
– Single electron effects and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186
– Models for granular superconductivity: the effect of quantum fluctuations - Zimányi 152 (1988) 233
– Influence of dissipation on the finite temperature phase transition in Josephson junction arrays - Kampf and Schön 152 (1988) 239
Quasiperiodic order
– Phase coherence and dynamics in weakly-coupled periodic and quasiperiodic superconductor arrays - van Harlingen et al. 152 (1988) 134

Random Josephson networks
– Fractal description of ferromagnetic glasses and — - Lebeau et al. 152 (1988) 100
– Experiments on random Josephson network - Kobayashi 152 (1988) 223
Random plaquette areas
– Disorder in Josephson junction arrays - Kosterlitz and Granato 152 (1988) 62
Reentrant behavior
– Influence of dissipation on the finite temperature phase transition in Josephson junction arrays - Kampf and Schön 152 (1988) 239
Reentrant effect
– Superconducting coherence in bulk granular metals - McLean et al. 152 (1988) 230

Reentrant transition
– Transitions in lattice superconductors induced by quantum fluctuations - Jacobs and José 152 (1988) 148
Reversible and irreversible behaviour
– Glassy behaviour in high-T_c superconductors - Morgenstern et al. 152 (1988) 85
RSJ model
– Models for granular superconductivity: the effect of quantum fluctuations - Zimányi 152 (1988) 233

Scaling
– Non-universal Kosterlitz–Thouless jumps and two-dimensional *XY*-type models - Minnhagen and Weber 152 (1988) 50
– Fractal description of ferromagnetic glasses and random Josephson networks - Lebeau et al. 152 (1988) 100
Self-consistent harmonic approximation
– Quantum fluctuations and the current–phase relation in Josephson junctions and SQUIDS - Panyukov and Zaikin 152 (1988) 162
Semiconductor heterostructures
– Piezoelectric-phonon scattering in the transport properties of low-dimensional — - Comas et al. 152 (1988) 352
Serially coupled junctions
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
SET oscillation
– Single electron effects and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186
Shapiro-step
– How to observe the AC Josephson-type oscillation around the quantum Hall effect - Imry 152 (1988) 295
Shot noise
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
– Single electron effects and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186
Sierpinski gasket
– Fractal dimensions and dimensional crossover in superconducting wire networks - Gordon and Goldman 152 (1988) 125
Single electron effects
– — and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186
Soft spin representation
– Models for granular superconductivity: the effect of quantum fluctuations - Zimányi 152 (1988) 233
Solitary waves (see *Plasma, multicomponent*) 152 (1988) 385
Specific heat (see *Hexammines*) 152 (1988) 347
Spin-glass state
– — in a disordered sine–Gordon model - Panyukov and Zaikin 152 (1988) 70
Spin glasses
– Glassy behaviour in high-T_c superconductors - Morgenstern et al. 152 (1988) 85

Strong dissipation
– Single electron effects and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186
Subgap conductance
– Quantum fluctuations in normal metal–superconductor and superconductor–normal metal–superconductor devices - Guinea and Schön 152 (1988) 165
Superconductor–normal metal–superconductor sandwiches
– Quantum fluctuations in normal metal–superconductor and superconductor–normal metal–superconductor devices - Guinea and Schön 152 (1988) 165
Surface potential
– Modified method of variational calculation of generalized Wannier functions for a crystal with a model — - Modrak 152 (1988) 367
Susceptibility
– Magnetic properties of a superconducting network - Gandit et al. 152 (1988) 32
– Glassy behaviour in high-T_c superconductors - Morgenstern et al. 152 (1988) 85
Swiss-cheese model
– Finite-voltage behavior of highly-disordered granular superconductors - Bradley et al. 152 (1988) 282
Symmetry breaking
– Axion-packed superconductors - Jacobs 152 (1988) 288

Three-dimensional arrays
– Superconducting coherence in bulk granular metals - McLean et al. 152 (1988) 230
3d metals (see *Alloys, binary*) 152 (1988) 303
Threshold resistance
– Influence of dissipation on the finite temperature phase transition in Josephson junction arrays - Kampf and Schön 152 (1988) 239
Topological excitations
– Transitions in lattice superconductors induced by quantum fluctuations - Jacobs and José 152 (1988) 148
Transit time of tunneling
– Measuring the time spent traversing the barrier while tunneling - Martinis et al. 152 (1988) 159
Transmission line
– Measuring the time spent traversing the barrier while tunneling - Martinis et al. 152 (1988) 159
Transport properties (see *Semiconductor heterostructures*) 152 (1988) 352
Tunneling, single electron
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
Twin boundaries
– Coherence in 3D networks: application to high-T_c superconductors - Rosenblatt et al. 152 (1988) 95
Two order free energy functional
– Fluctuation effects in granular superconductors of intermediate paracoherent transition temperature - Fazio et al. 152 (1988) 257

Ultra-thin films
– Global phase coherence and dissipation in ultra-thin superconducting films - Jaeger et al. 152 (1988) 218

Universal jump
– Monte Carlo simulations for two-dimensional *XY* models with frustration - van Himbergen 152 (1988) 46
Universal resistance threshold
– Global phase coherence and dissipation in ultra-thin superconducting films - Jaeger et al. 152 (1988) 218

Voltage steps
– Observation of "Bloch oscillations" in granular tin films - Yoshihiro 152 (1988) 207
Vortex configuration
– Uniformly frustrated *xy* models: ground state configurations - Teitel 152 (1988) 30
Vortex "lattice"
– On the critical current of a Josephson junction array in a magnetic field - Halsey 152 (1988) 22
Vortex tunneling
– Intersite vortex tunnelling in 2D lattice systems - Korshunov 152 (1988) 261
Vortex unbinding
– Dynamics of critical phenomena in Josephson junction arrays - Martinoli 152 (1988) 146
Vortex-unbinding transition
– Non-universal Kosterlitz–Thouless jumps and two-dimensional *XY*-type models - Minnhagen and Weber 152 (1988) 50
– Disorder in Josephson junction arrays - Kosterlitz and Granato 152 (1988) 62

Wannier functions
– Modified method of variational calculation of generalized — for a crystal with a model surface potential - Modrak 152 (1988) 367
Waving domain walls
– Uniformly frustrated *xy* models: ground state configurations - Teitel 152 (1988) 30
Wire networks
– Fractal dimensions and dimensional crossover in superconducting — - Gordon and Goldman 152 (1988) 125
– Phase coherence and dynamics in weakly-coupled periodic and quasiperiodic superconductor arrays - van Harlingen et al. 152 (1988) 134

XY model
– On the critical current of a Josephson junction array in a magnetic field - Halsey 152 (1988) 22
– Non-universal Kosterlitz–Thouless jumps and two-dimensional *XY*-type models - Minnhagen and Weber 152 (1988) 50
XY-spin-glass model
– Glassy behaviour in high-T_c superconductors - Morgenstern et al. 152 (1988) 85

Zener tunneling
– The dynamics of mesoscopic normal tunnel junctions - Mullen et al. 152 (1988) 172
– Single electron effects and Bloch oscillations in normal and superconducting tunnel junctions - Geigenmüller and Schön 152 (1988) 186
